Fellow Area III FFA,

I might be labeled an FFA nerd. Trust me I wear the title proudly. I might get a little too excited when I talk about my passion for farming, but often I take time to wonder what other FFA Members are passionate about.... I wonder what you sound like when you talk about those passions. I wonder if you “nerd out” a little. I wonder if you imagine yourself 20 years from now living your dream. My dad has said once, twice, or more like a million times, “Living the Dream!” He says that so often because he knows he landed right where he had always planned and was living the life he dreamed of all along. Many times people settle for a lifestyle. Settle for a career they don’t have any passion for or they work at a job they despise. Area III, we are young and we are creating opportunities now to shape our futures. Your dreams are so important. I encourage you to never settle. I encourage you to plan to succeed. I encourage you to get tough and fight to make your dreams reality. You bet it will be tough. It is promised to be a struggle. It may even not be fair at times, but never give up.

– *Brady Morgan*
